Custom themes

The aspect of users login pages and users dashboard can be change.

The settings are done in the tab **Graphical themes** or using the URL:

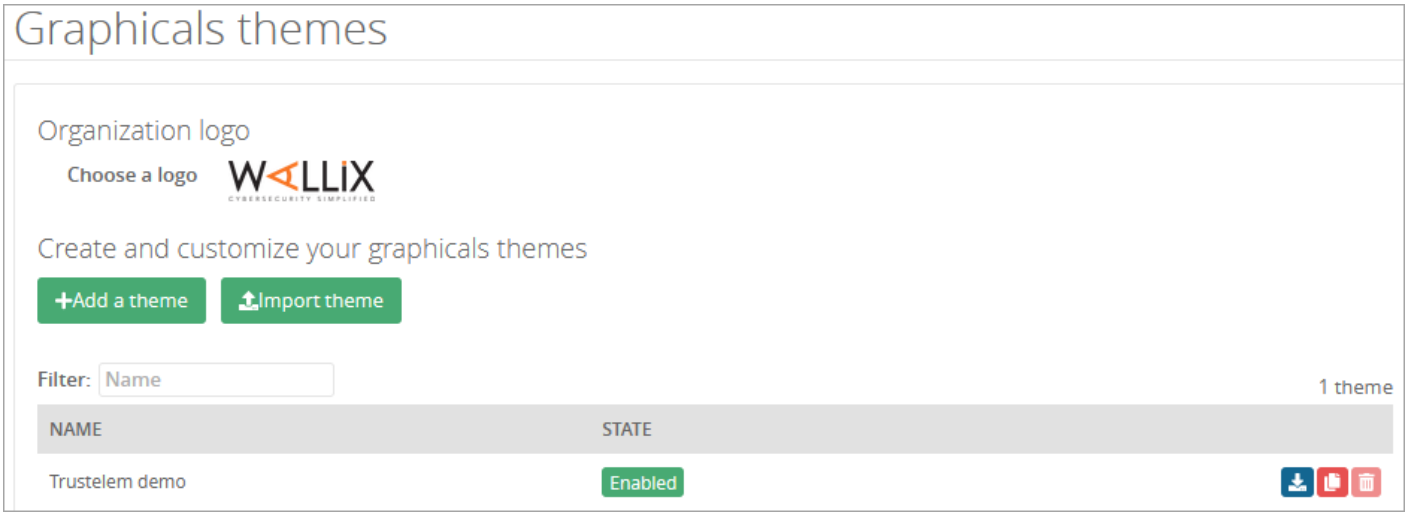

`https://admin-mydomain.trustelem.com/app#/themes`

***Note**: right now, this feature is not activate by default. If you want to customize your login page / dashboard, please email support-trustelem@wallix.com.*

What can I do?

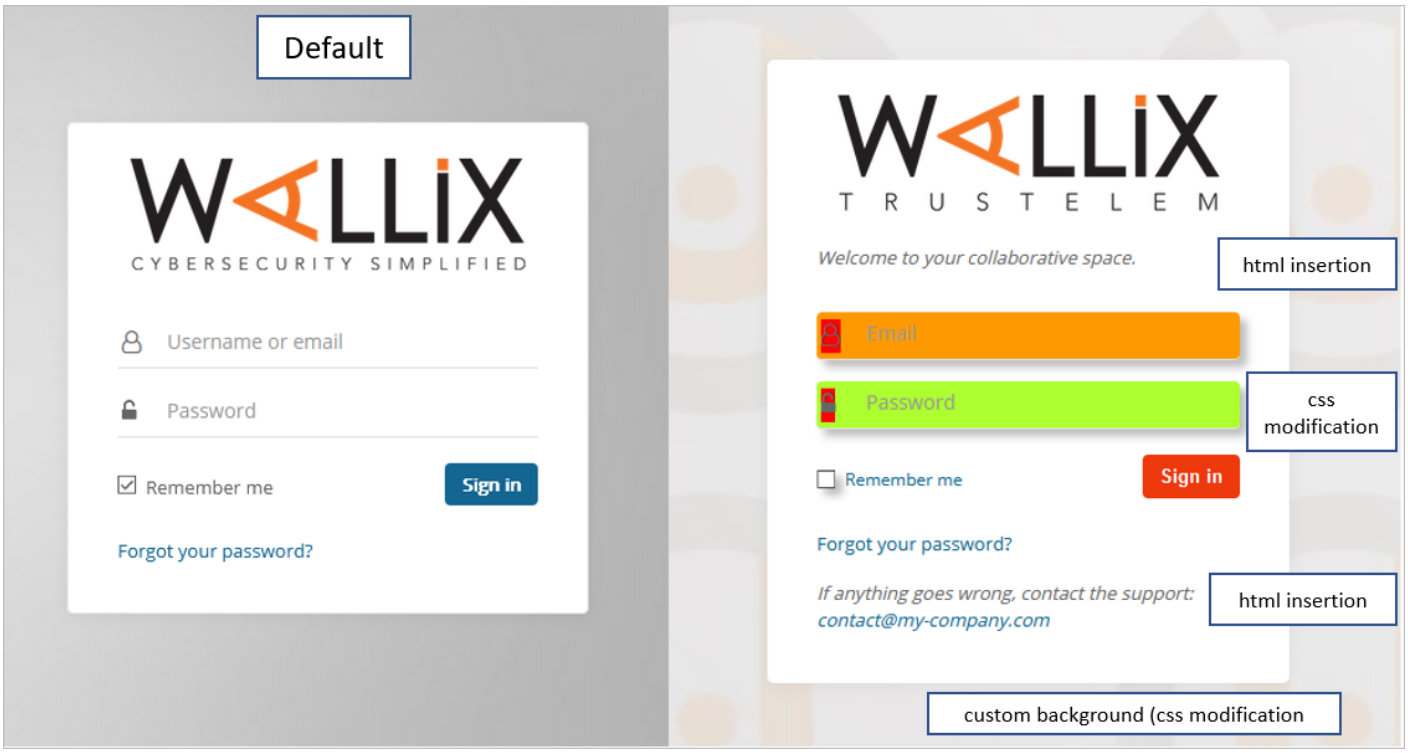

On this page you can:

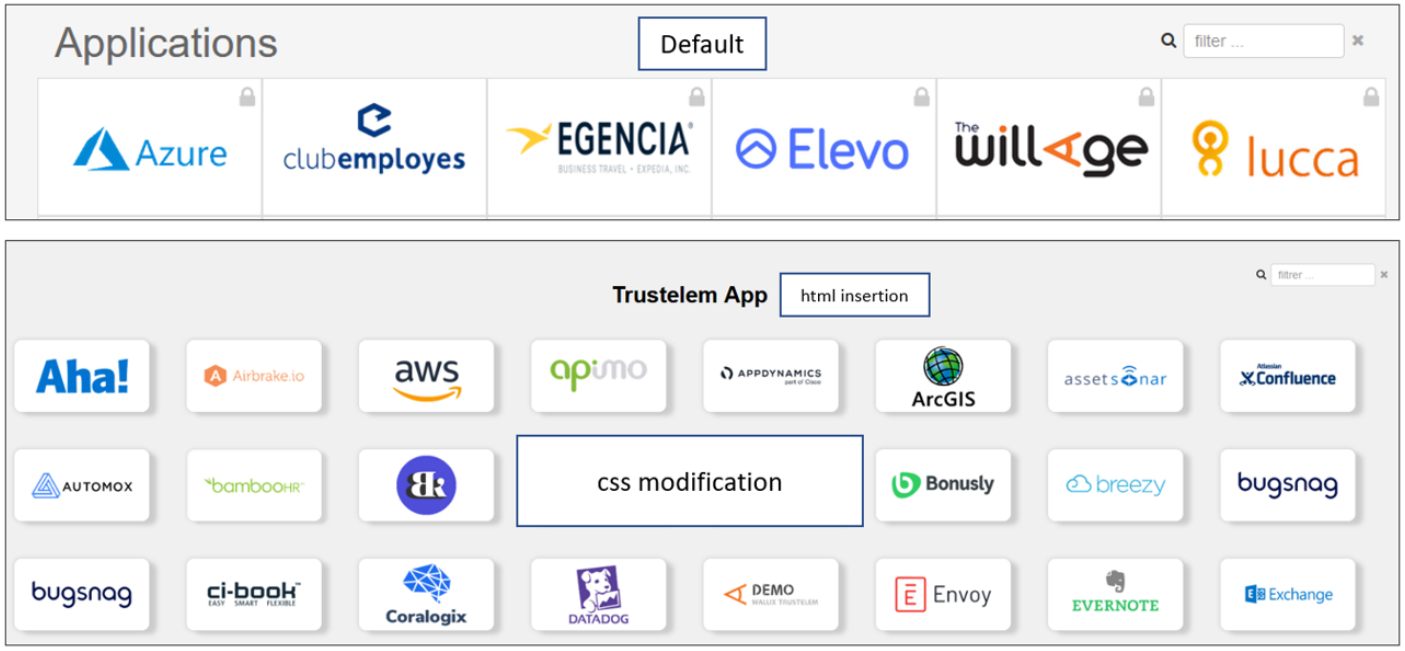

- change the logo of your Trustelem subscription
- create a new theme
- import an existing theme
- enable / download / copy / delete an existing theme

By creating a theme, you can:

- Add some html in some specific places of the login pages / dashboard
- Modify the CSS of the login pages / dashboard
- Add some js script to the login pages / dashboard

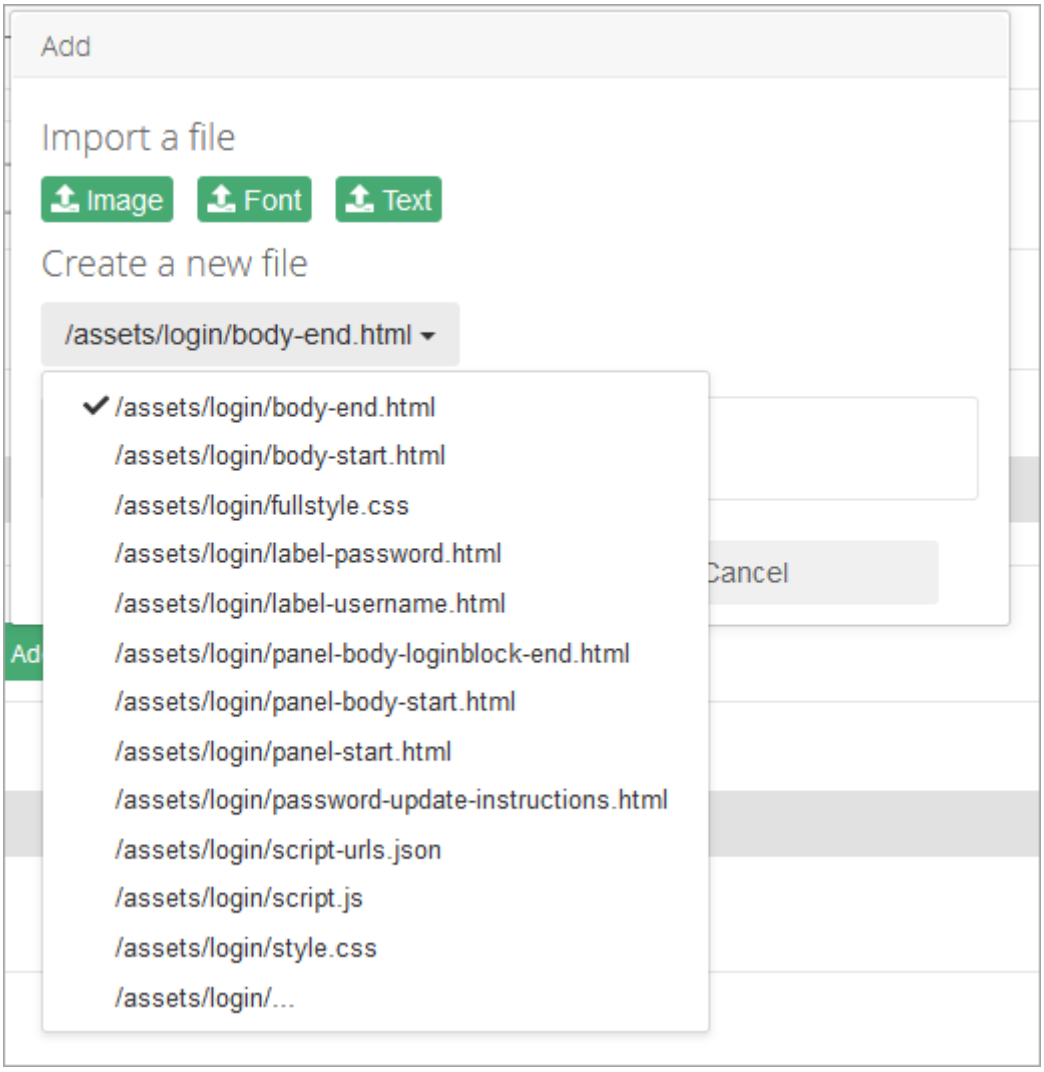

How does it work?

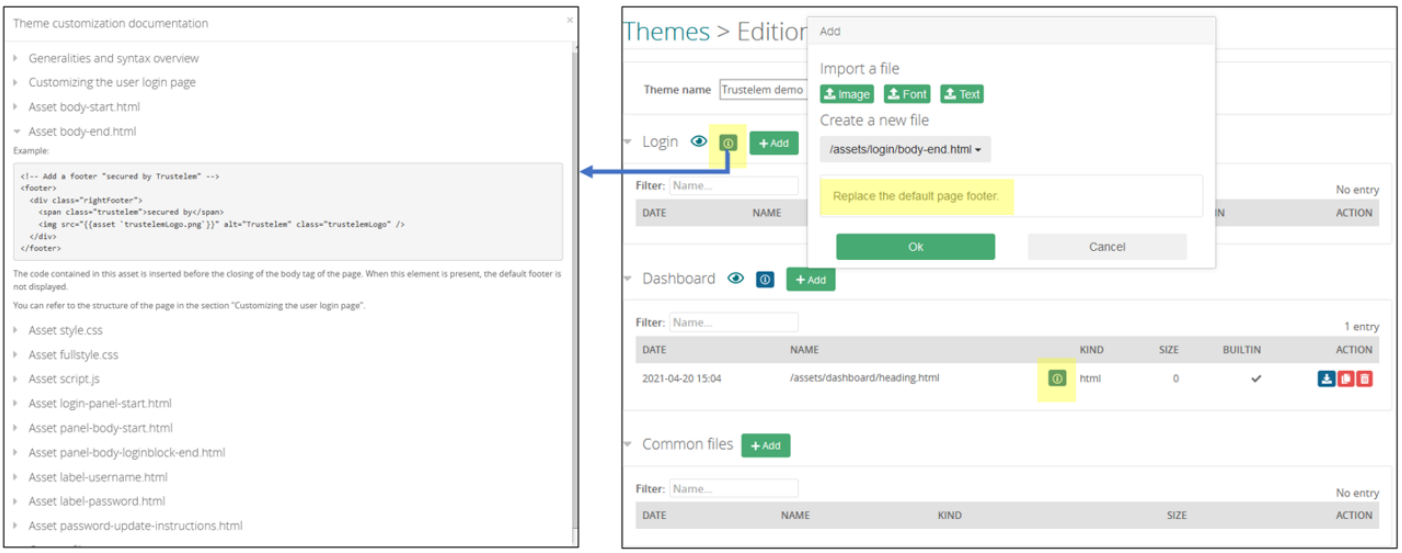

The edit page is divided in 3 parts:

- **Login** is the place used to add files (html, css, js) which modify the login pages
- **Dashboard** is the place used to add files (html, css, js) which modify the dashboard page
- **Common files** are all the files used by the other files, like images or fonts
  Note: you can also change the favicon of your pages by uploading here an image named **favicon.ico**

To add a new file, just click on **+Add** on one of the 3 parts. Then select the file needed or import your own file.

In order to know what does each file, you have some documentation:

Finally, if you click on the **eye buttons**, you will have a preview of your pages.
