Bugsnag

Bugsnag Configuraiton

- Log into your Bugsnag admin session and go to Organization settings
- Click on Single Sign-On and fill the following field:
  - SAML/IdP Metadata URL

```
https://mydomain.trustelem.com/app/33XXXX/metadata
```

- You can check Auto-provision collaborators if you wish collaborators to automatically join your organization when they log in through SSO
- You can also check Force your team to log in via your SSO provider to prevent authentication with login and password, but this option is available only once an administrator logged in through SSO

Trustelem Configuration

- On Trustelem, write the name of your Bugsnag organization in the corresponding field
