# Datadog

## Datadog Configuration

- Log into your Datadog admin session and in the bottom left corner, go to Configure SAML
- Download Trustelem metadata and import them in Datadog
- To allow the automatic creation of new accounts when users log in for the first time you need to verify a domain name associated to users emails in Just-In-Time Provisioning

## Notes

- In the Additional features, check Identity Provider Initiated Login
- By checking SAML Strict Mode, users will have to log in through SSO

## Trustelem Configuration

- Copy the Single Sign-on URL given in Datadog and paste into the corresponding field on Trustelem
