Snowflake

Snowflake Configuration

- Log into your Sysadmin or Accountadmin account on Snowflake
- Go on Worksheets, create a new worksheet and copy this in it:

```
use role accountadmin;
alter account set sso_login_page = TRUE;
alter account set saml_identity_provider =
'{
    "certificate": "MIIDUTCCAjmgAwIBAgIXXX",
    "issuer": "https: //mydomain. trustelem. com/app/33XXXX",
    "ssoUrl": "https: //mydomain. trustelem. com/app/33XXXX/sso",
    "type"  : "custom",
    "label" : "Trustelem"
}';
```

- Then click on Run

Trustelem Configuration

- Copy your Snowflake account URL: it should look like this
  `https: //[account_name]. snowflakecomputing. com/` or this
  `https: //[account_name]. [region_id]. snowflakecomputing. com/`
- On Trustelem, paste this URL in the EntityID, do not forget the "/" at the end
